CONSCIOUS DESIGN
INSTITUTE

Space Clearing and harmonizing is a vital part of maintaining healthy space, and has been part of our human culture and practice for thousands of years.

As we work to maintain a healthy body, mind and spirit, we must cleanse our homes to make room for new intentions and experiences.

We can apply new paint, beautiful furnishings and feng shui techniques, but it is like "putting clean clothes on a dirty body."

Space clearing allows us to revitalize our homes' matrix, which can hold the history and trauma of the past.

Personalized Training

By the end of this personalized program, you will:

- Be confident reading and clearing spaces to create positive change
- Have a toolkit of techniques taught by of teachers from all over the world
- Have a professional space clearing kit that can be used personally and professionally
- Have experience in both remote and on site clearing and energy work
- Create environments that are healing at every level, while staying grounded and secure in your personal energy

A NOTE FROM THE INSTITUTE FOUNDER

Coming from a Greek and Italian background, I grew up with these techniques and have been blessed to have studied and trained in space clearing for many years. My professional field of Conscious Design and Real Estate has brought me hundreds of clients with issues ranging from illness, negative luck, houses that refuse to sell, romance problems, and distressed children - Space Clearing has been a vital part of the healing process, and I have seen how valuable it can be to shift the course of people's lives.

Through the Conscious Design Institute, I have created an intensive certification program in Space Clearing, taught by expert practitioners and teachers to share knowledge, experience, and wisdom with us from around the globe.

The Certification is a deep experience with in depth classes, live space clearing consultations, independent work and individual mentoring. Space clearing is an incredibly powerful art, and this program was created to ensure that all graduates have a thorough understanding and mastery of shifting the energy of space to make a positive impact in our environments. We want to equip you with an abundance of knowledge, practice, and support.

This is a unique calling, and if it speaks to you, we look forward to working with you and supporting you on your personal and professional journey.

Testimonials

WHAT PAST STUDENTS ARE SAYING

In the Spring of 2016, I had the privilege of becoming a Certified Space Clearing Professional through Renae Jensen of the Conscious Design Institute. This extremely sensitive work was taught by one of the finest, and most experienced teachers I have had the honor of working with.

Renae Jensen has designed a comprehensive, all- inclusive curriculum, encompassing the many modalities used in cleansing, harmonizing, and rebalancing space. Each lesson, addressing the many facets that are experienced, was presented in word and in type for our reference.

Demonstrations, as well as active participation, were utilized in creating a firm respect, and understanding. Specialized Practitioners also accompanied Renae during some of the sessions, providing us a full palette to use in our own work.

I highly recommend this fascinating course, and I'm so very grateful for the knowledge attained. It will be an invaluable piece in your toolbox, pulled to use in every avenue of life.

- Phyllis Alise McGeehan

Class was amazing. You put so much love and beauty in the details. I am so grateful.
